

Universal Fiber Adapter Plate, Corning® WCH, CCD & EDC Closures to LGX

Use LGX style Fiber Optic Adapter Plates in Corning closures

The Universal Adapter Plate from RLH allows the use of RLH LGX style adapter plates within Corning WCH, CCH or EDC closures. This is especially useful when original manufacturers's adapter plates are not obtainable due to availability or lead times.

This adapter is designed only to accept LGX adapter plates, and is not compatible with LGX style cassettes or modules.

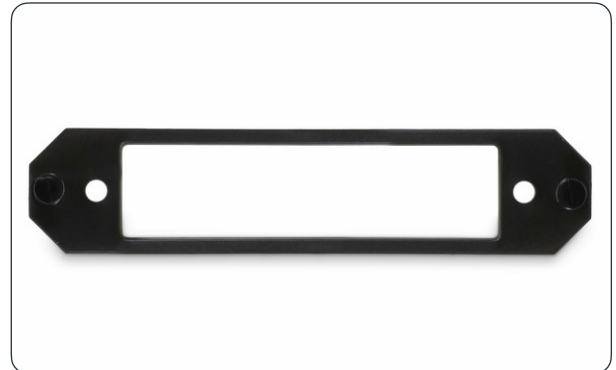

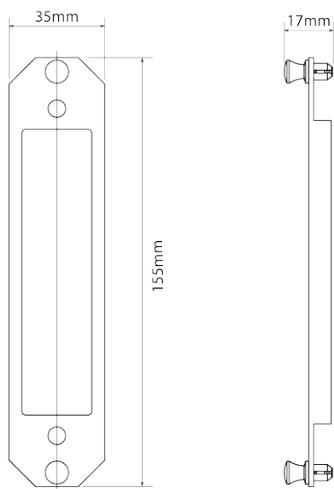

Specifications
